The annual accounts as at and for the year ended December 31, 2016 have been audited and the audit report was signed on March 17, 2017.

BNP Paribas Fortis Funding S.A. presented the attached statement of cash flows in Euro.

The Company has used the following principles for the purpose of presentation and classification in this statement of cash flows:

Cash flows are inflows and outflows of cash and cash equivalents. Cash may comprise cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

The statement of cash flows shall report cash flows during the period classified by operating, investing and financing activities.

Operating activities

Operating activities are the principal revenue-producing activities of the company and other activities that are not investing or financing activities. Cash flows from operating activities are primarily derived from the principal revenue-producing activities of the company. Therefore, they generally result from the transactions and other events that enter into the determination of profit or loss.

The company reports cash flows from operating activities using the method whereby profit or loss is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments, and items of income or expense associated with investing or financing cash flows.

Investing activities

Investing activities are the acquisition and disposal of long-term assets and other investments not included in cash equivalents.

Notes to the Statement of cash flows for the year ended December 31, 2016

Financing activities

Financing activities are activities that result in changes in the size and composition of the contributed equity and borrowings of the company.

A company shall report separately major classes of gross cash receipts and gross cash payments arising from investing and financing activities.

Non-cash transactions

Investing and financing transactions that do not require the use of cash or cash equivalents shall be excluded from a statement of cash flows. Such transactions shall be disclosed distinctly in the financial information in a way that provides all the relevant information about these investing and financing activities.

Foreign currency cash flows

Cash flows arising from transactions in a foreign currency shall be recorded in Euro by applying to the foreign currency amount the exchange rate between the Euro and the foreign currency at the date of the cash flow.

Unrealised gains and losses arising from changes in foreign currency exchange rates are not cash flows. However, the effect of exchange rate changes on cash and cash equivalents held or due in a foreign currency is reported in the statement of cash flows in order to reconcile cash and cash equivalents at the beginning and the end of the period.
